& More..

----- COMPATABILITY -----

All Android Devices running software v1.6 and above including the G1, HTC Dream, HTC Hero, Moto Droid, Droid Eris, Devour, MyTouch and others

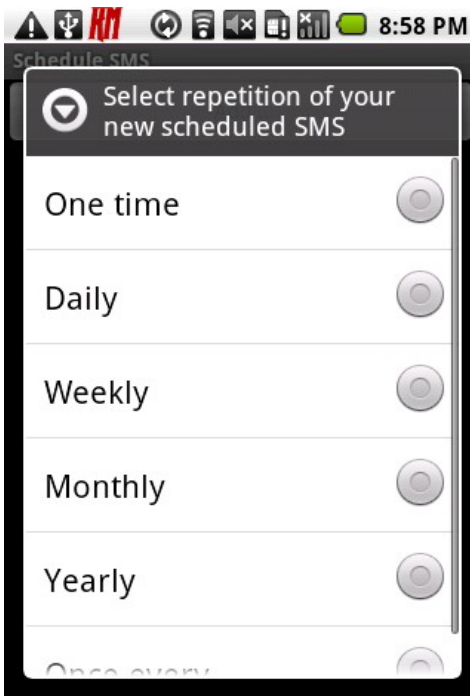

AdvanceSMS USER GUIDE

A nifty home screen widget can be added by Pressing the Options menu key while on the home screen, then choosing "Add" -> "Widgets" -> then choosing AdvanceSMS

SCHEDULING SMS's

This can be achieved in one of two ways. Either directly from the application by choosing the "Schedule SMS" option or as an option you're given when choosing to send an SMS to a contact.

Step 1 - Choose "Add" to start scheduling a message

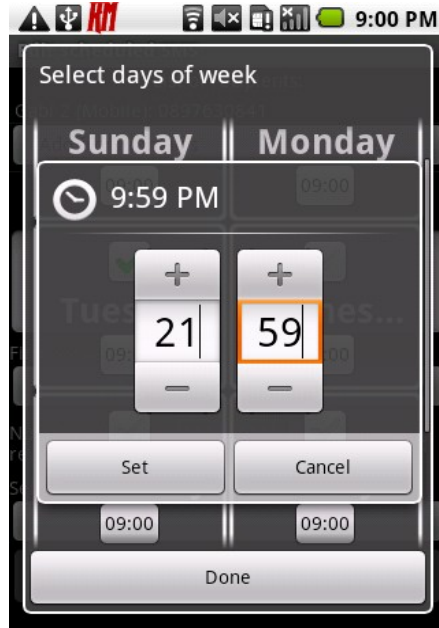

Step 2 - Indicate the interval you want to schedule the message. Choose "one

time" if it's only going to be sent once

Step 3 - Choose the Number you're sending the SMS to either from your Contacts or inputting the number manually

Step 4 - Type the text of the message

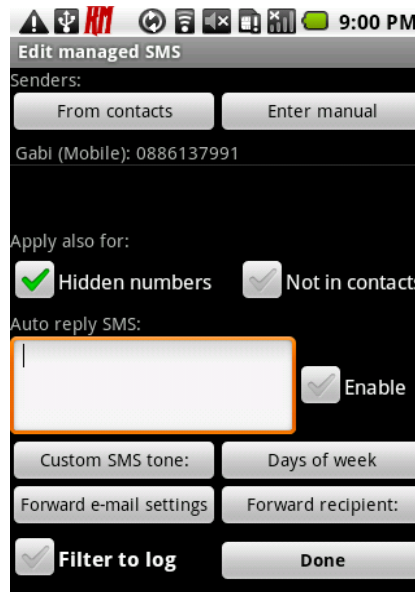

Step 5 - Set the time & Date the message is to be sent (click "First Occurrence")

Step 6 - Indicate if you want the message to be repeated, and how many times it should be repeated (check "Unlimited" if you want it to be repeated "indefinitely")

Step 7 - Click done and you're good to go!

MANAGE SMS's

From here you have the ability to Filter, Auto-Reply, Forward and set custom SMS tones for specific senders. Input the number you wish to apply this

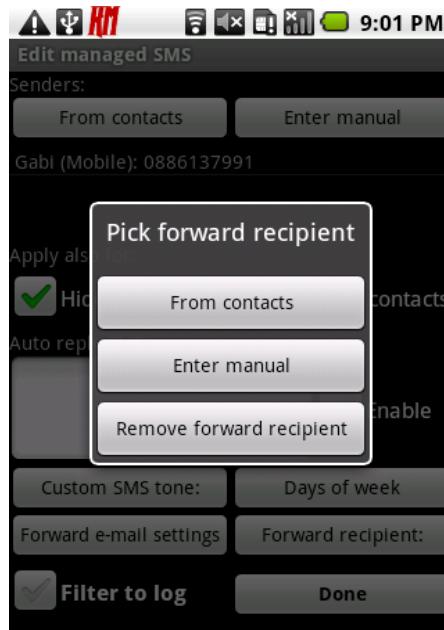

behavior to (you can setup as many entries and scenarios as you'd like) either from your contacts, logs or inputting it manually. More than one contact or number can be setup for each entry.

* Check off the also apply for "Hidden Numbers" if you'd like this action to be taken for hidden/unknown/private/withheld numbers, and "Not in contacts" if you'd like to apply this behavior to any SMS coming from a non-contact

AutoReply SMS - Input the AutoReply message and check the "Enable" button to activate

CustomSMS tone - Indicate the SMS tone you want to be played when receiving SMS's from the number/contact indicated

Forward Recipient - Set a number you wish to forward these SMS's to

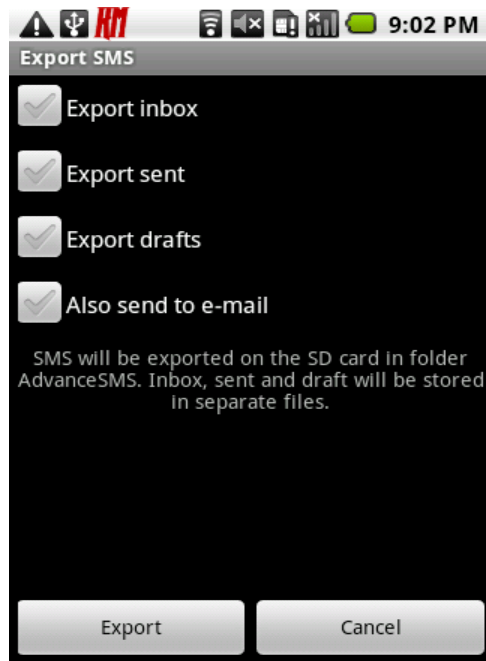

Days of Week - Indicate the days of the week you want this specific behavior active for

Filter to Log - This will silently receive the SMS and send it to the application logs. * The incoming SMS indicator will still be seen even with this feature activated

EXPORT SMS

AdvanceSMS allows you to export your SMS's, either to a log file on your SD card, or to a specified email address.

Choose which SMS's you want to export (Inbox, Sent, Draft or any combination of the three) and where you want to export them (To your SD card and/or to an email account)

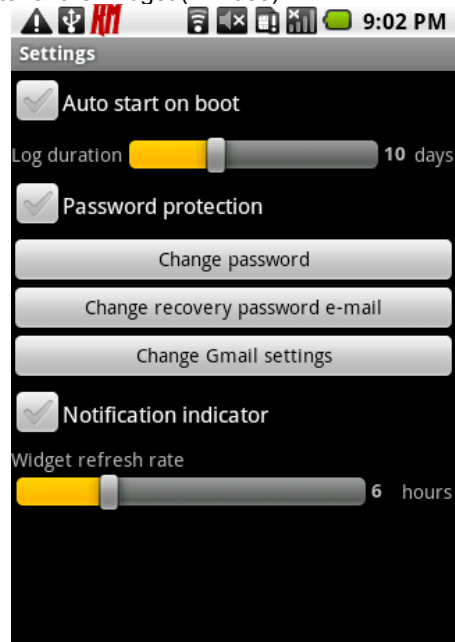

APPLICATION SETTINGS

AutoStart on Reboot – Indicate if you want the application to startup when you restart your device

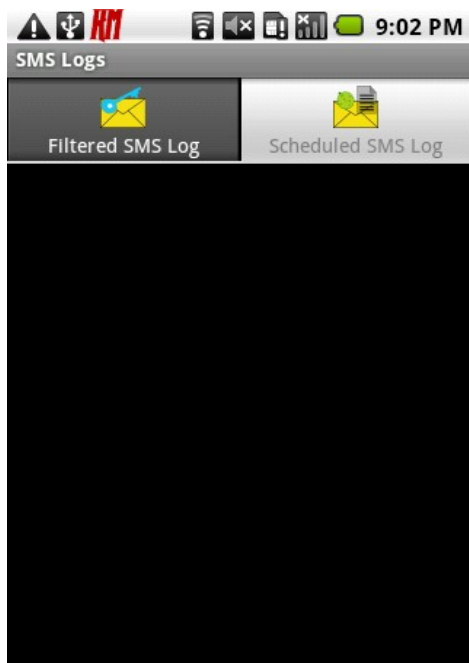

Password Protection – If set, will require you input your password to access the application
- You can set a Password recovery email in case you forget your password later on

Notification Indicator – Set the refresh rate for the Widget (if in use)

SMS LOGS

Here you can see a list of Filtered, Forwarded, Auto-replied and Scheduled SMS's handled by the application.
